

ISIS 140.01: Fundamentals of Web-Based Multimedia Communications
Instructor: Richard Lucic
Spring 2007 Student Evaluations

-Very good course, gives you a base knowledge of multimedia communication, especially html. Skills acquired: Can now create webpage, edit sound files and movies, do simple work in Photoshop and Flash.

-It was very practical information. It was a good mix of lectures and labs.

-Professor Lucic is one of my favorites. It's a real good class overall. The units vary greatly, some much more challenging than others. Course extremely clear. Great use of Blackboard. Really like Professor Lucic.

-I think the class was incredibly successful at teaching me the basics of all these topics with its limited time frame. It was fun too! Instructor was understanding and helpful. I'm really glad I took this class—I think the skills I've learned in here will be useful in the real world.

-Instructor was very helpful during class!

-The course was hands-on and designed to help students gain skill. The instructor made great choices in topics and activities. Assignments helped build skills. Thinking was a key part of design and planning. The course was well-planned. Lots of different skills were involved.

-This course was fabulous—probably one of the best and most useful courses I've ever had. Professor Lucic was extremely helpful and accessible. The tasks were extremely useful. I am so glad I took this course! It was truly one of the most useful courses I could imagine! Great course, great instructor!

-Richard Lucic is an absolutely fantastic teacher. Duke is incredibly lucky to have him. He teaches skills that are immediately useful in real life. It is so interesting. If this subject material were on a TV channel I would watch it every day. If it were a viable option, I would take this class again because I was exposed to so many interesting things. This course teaches skills that would benefit anyone, and would compliment any field of study at Duke. Richard Lucic has set up an incredible program. The ISIS department is keeping Duke at the forefront of emerging technology. Support it and develop an ISIS major.
